mylesenriquez.dev · github.com/enriquezm

Design engineer working between Figma and production, building TypeScript interfaces, design systems and the tooling that keeps design and code in sync. Seven years shipping UI at Slickdeals. Vue and Nuxt are my primary stack, and I'm comfortable in any component-based framework.

EXPERIENCE

Senior Full Stack Engineer · Slickdeals — 2024 — Present

- Added a semantic color layer to the design tokens.
- Built the new Nuxt search page: filters, filter pills, sorting, pagination and the Price Intelligence widget.
- Built the homefeed UI, including the feed tab bar, sticky feed bar, an in-house pill carousel that replaced a third-party library, and the opt-in flow's popups, toasts and modals.
- Built real-time deal-score voting and the community voting bar, with skeleton loading states.
- Built CMS modular page blocks end to end: search results, deal collections, filter suggestions and category circles.
- Built and ran the A/B tests for the standardized deal card and deal card grid.
- Built the Giveaways (Daily Draw) experience, including carousels and past winners.

Frontend Engineer · Slickdeals — 2019 — 2024

- Core contributor to Blueprint, the Slickdeals design system and pattern library, with 2,000+ file changes across its SCSS, Twig and JavaScript.
- Built Blueprint patterns including the CSS grid deal card, expired-deal variants, product page header and an animated hero banner, and rolled them out to category, store and landing pages.
- Built Vue components for the vuerango component library with Storybook stories, fixtures and tests.
- Led the front end of the Loyalty and Cashback program: the cashback page, rewards panel, redemption portal and onboarding flow.
- Built store pages and coupon tiles with responsive layouts and an accessible verified-coupon logo.

Web Specialist · UNLV — 2017 — 2019

SKILLS

Design	Figma, design tokens, design systems, Storybook, prototyping
Frontend	Vue, Nuxt, TypeScript, JavaScript, SCSS, Tailwind
Backend	Node.js, PHP, Twig, GraphQL, AWS
Practices	A/B testing and feature flags (LaunchDarkly), accessibility, code review

EDUCATION

B.A. Computer & Information Sciences · University of Hawai‘i at Mānoa — 2015
